Career Objective

Eager to propel my career as a dynamic Full Stack Developer, I bring a proven record of excellence in web development, honed during my tenure as a Full Stack Developer Trainee at Technical Hub. Armed with proficiency in HTML, CSS, JavaScript, React Js, and Node Js, I seamlessly developed a real-time Car Rental Application, showcasing my commitment to creating intuitive user experiences. MTA Certified in Python, IT Specialist in JavaScript, and equipped with a strong academic background in Electronics and Communication Engineering, I am poised to contribute innovative solutions and technical prowess to a forward-thinking organization, driving excellence in software development.

Skills

Web Development: HTML, CSS, JavaScript, React JS, Node JS, MongoDB, Express JS.
Coding Languages: Java, C++.

Education

Aditya College of Engineering, Surampalem
Electronics and Communication Engineering (B.Tech)
2020-2024, **CGPA: 7.33/10**

Aditya Junior College, Mandapeta
M.P.C (Intermediate)
2018-2020, **CGPA: 9.50/10**

C.A.M.P School, Ramachandrapuram
2017-2018, **CGPA: 9.3/10**

Certifications

- IT Specialist JavaScript.
- MTA Certified on Python.
- Java Foundations from Oracle.

Internships

Technical Hub, Surampalem
Full Stack Developer Trainee   (July/2022) - (April/2023)
As a Full Stack Developer Trainee at Technical Hub (July 2022 - March 2023), I immersed myself in a dynamic learning environment, refining both front-end and back-end skills. Collaborating on diverse projects, I actively contributed to the creation of robust applications, utilizing HTML, CSS, JavaScript, React Js, Node Js, and MongoDB Database. This experience, while emphasizing continuous improvement in backend capabilities, provided practical insights into industry standards and real-world application scenarios. The internship has been instrumental in broadening my skill set and instilling a passion for delivering high-quality and innovative solutions, positioning me well for a successful career in full-stack development.

Projects

Car Rental Application

This innovative real-time car rental application offers a seamless user experience, providing two distinct login interfaces for both customers and owners. Users have the convenience to create their accounts, effortlessly book their preferred vehicles, and effortlessly manage their booking details. For owners, the system enables effortless car management, allowing them to add new vehicles, update existing car information, and gain valuable insights into their bookings.

Tech Stack: HTML, CSS, JavaScript, React Js, Node Js, MongoDB Atlas.

Hospital Management Application

I spearheaded the development of a cutting-edge Hospital Management Application, revolutionizing manual processes within healthcare institutions. This web application seamlessly generates outpatient (OP) records, captures patient details, and monitors medical stock availability. Leveraging HTML, CSS, JavaScript, React Js, Node Js, and MongoDB Database, the project showcased my commitment to digital transformation and ability to deliver streamlined solutions for enhanced operational efficiency in healthcare.

Tech Stack: HTML, CSS, JavaScript, React Js, Node Js, MongoDB Atlas.

STAAR Exports & Imports (Freelance Project)

Pioneered the creation of an innovative E-Commerce website tailored for the international exports and imports landscape. Developed a sleek and intuitive store, empowering global users to seamlessly purchase products. Implemented a sophisticated email notification system, ensuring efficient communication of product requirements to the owner. Leveraged a robust tech stack, combining HTML, CSS, and JavaScript for the front end, while integrating Node Js and MongoDB for dynamic back-end functionalities.

Tech Stack: HTML, CSS, JavaScript, React Js, Node Js.

Legis Code (Freelance Project)

Spearheaded the development of a comprehensive website catering to legal practitioners. Designed an accessible page featuring a categorized repository of laws and sections, enhancing user engagement. Implemented a dynamic blog platform empowering the advocate to share daily insights. Crafted a captivating home page seamlessly integrating about and contact information. This project showcases my ability to merge information accessibility with user-centric design, providing a sophisticated platform for legal professionals to share insights and connect effectively.

Tech Stack: HTML, CSS, JavaScript, React Js, Node Js.
